## ARCA STYLE QUICK RELEASE MOUNTING SYSTEM

### Mounting Conversion plate to Manfrotto 405/410 Gear Head

Original Manfrotto Gear Head

Remove the mounting plate

Rotate head up side down

Insert provided 3mm hex wrench into screw opening

Remove original screw from head

After screw is removed, all original components can be removed from the gear head

Check if all original components have been removed

Place original items somewhere safe in case you decide to reassemble head in the future

Align head with conversion plate. Best way to do this is by placing plate on flat surface and then placing gear head on top

Insert screw into original head. Smaller screw goes into opening near to round surface

Attach conversion plate to original head with two screws

Final Step:  
Attach head to Tripod
